

# Affordable Innovation

## Energy

**IPS provides a variety of energy and operational service offerings:**

Corporate Energy Management and Sustainability Program Development
Energy Audits and Assessments
Energy Master Planning
Sustainable Design and Design Reviews
Greenhouse Gas Emissions and Management
Retrocommissioning
Energy Modeling and Simulation
Lighting and High Efficiency Motor Upgrades
HVAC System Optimization
Cogeneration or Combined Heat and Power (CHP) Systems
Peak Shaving Systems
Renewable Energy
Engineering
Construction Management
Project Savings Verification
Incentive Procurement

**Affordable Innovation for Manufacturing Technology**  
Engineering • Procurement • Construction Management • Validation

## IPS can help you achieve your energy goals.

Our staff provides the flexibility to adapt to changing market conditions and will align with your needs. We have worked with leading companies around the world to lower costs, improve productivity, profitability, and establish / lower energy budgets. We go beyond the traditional scope of Engineering services companies and look at reliability, process, and process-related systems using our risk based approach to energy savings. In addition we can provide a comprehensive energy and environmental management program.

Our knowledge, technical capabilities, and creativity will develop solutions to improve efficiency, productivity, financial performance and reduce risk and cost.

Our efficiency and productivity (Green and Lean) services are designed to reduce energy and operating costs, increase productivity, and modernize facilities and in many cases, we enhance safety and comfort, and achieve regulatory compliance.

- Reduce Operating Costs
- Reduce Emissions
- Identify / Implement Energy Conservation Opportunities (ECO's)
- Improve Financial Performance and Return on Investment
- Improve Competitive Edge
- Mitigate Energy-Related Risks and Costs
- Enhance Productivity
- Replace Aging Energy Assets
