The IPS Advantage: Taking Technology to Production

IPS is an industry-leader in developing innovative and affordable approaches to the design, construction, validation, and commissioning of regulated manufacturing facilities for pharmaceutical, API and biotech companies.

We know the people, the processes, and the facilities inside and out. As a single-source provider, IPS offers integrated solutions designed to meet your business objectives and make your capital project a success.

- Oral Solid Dosage Liquid, Creams, Ointments
- Sterile Aseptic Operations - Vials / Ampoules / Pre-Filled Syringes, Lyophilization
- Biotechnology-Monoclonal Antibodies, Bacteria Vaccines
- Upstream - Media, Bioreactors, Fermentors
- Downstream - Purification, Chromatography, Filtration, Buffer
- API / Fine Chemicals
- Potent Compounds, Cytotoxic Operations
- Labs and Clinical Facilities

As a start-up or emerging company, manufacturing is a principal concern in getting your product to market. Securing capital, site selection, lease versus buy decisions, manufacturing capacity, strategic recruiting, codes and regulations, design, building, and compliance are critical to a successful strategic plan. Whether you are newly financed or an established company, IPS can facilitate the process of taking technology to production.
