

Integrated Project Services

Affordable Innovation

Laboratories

IPS has a stellar core of laboratory planners, design professionals, architects, process engineers, engineers and compliance experts with industry operating experience who specialize in designing, building and validating many types of laboratories and facilities, including:

- | |
|---------------------------------|
| • Analytical & Quality |
| • BioHazard and Biologics |
| • Chemistry |
| • Pathology & Physical Sciences |
| • Clinical |
| • Containment |
| • Product Development / Pilot |
| • Toxicology / Vivarium |
| • Nanotechnology |

IPS is a proven leader in the design, construction management and validation of laboratories and R&D facilities. We fully understand the complexity of the design, laboratory operational excellence and specialized area architectural and engineering solutions required to meet highly technical needs. We apply our knowledge of state-of-the-art technologies and industry trends to develop optimized layouts and workflows. We construct hi-tech laboratories and facilities that optimize cost, schedule and technical performance to ensure project completion on time and within budget.

We offer:

- Experience in planning, design, construction, commissioning and validation of laboratories and facilities
- Operational excellence and benchmarking for laboratory operations
- An integrated approach for innovative technology to safely evaluate and handle HAZOPS
- Expertise in Safety, Health and Environmental Practices
- Expertise in the employment of risk-based commissioning and validation approach to improve efficiency, time and resources
- Energy and Efficient improvement capabilities to help reduce operating costs
