

LUNCH & LEARN

IPS shares its industry expertise by offering a broad range of technical topics key to achieving operational excellence and contributing to overall drug manufacturing success. The series of programs were developed to provide cost-effective opportunities to deliver in-house training and development to introduce and discuss technical know-how and industry best practices with IPS' subject matter experts.

IPS Lunch & Learn programs include the following topics:

- ISPE Engineering Baseline Guides
- Risk-Based Approach to Validation
- Energy Savings in Manufacturing Facilities
- Design / Build Project Delivery (EPCMV)
- Assessing Environmental, Health and Safety Compliance
- Impacting Project Life Cycle Cost: Facility Costs and Variances
- ASTM E2500: The Future of Commissioning and Qualification
- How to Resolve your Regulatory Issues: GMP Applications / Design
- Designing Effective High Purity Water Systems
- Integrated Commissioning and Qualification
- Current Trends in Efficient Lab / Animal Facility Design
- Simplifying Permitting Practices and Procedures
- Affordable Innovation: Potent Compound and Containment
- Project Controls: Helping to Keep Projects On Time and On Budget
- Construction Safety Management
- Target Costing: How to Make your Project Match your Budget
- All Aspects of Master Planning
- Achieving Operational Excellence
- Enhance Operations and Reduce Costs Through Retro-Commissioning
- Minimizing the Risk: Comprehensive Electrical System Analysis
- Enhancing Delivery of Complex Facilities with Building Information Modeling (BIM) Technology
- Achieve your Energy Goals Through Energy Audits and Assessments
- Integrated Lean Delivery
- Global Warming & the Pharmaceutical Industry
- Building Green
- Introduction to LEED
- Energy Codes
- Carbon Neutral Buildings
