IPS ANNOUNCES GROUNDBREAKING FOR BIOPOL LABORATORY, INC.

– Expanded design to include pollen and mite processing facilities –

Lafayette Hill, PA, July 16, 2007 – Integrated Project Services (IPS), a leading, full-service engineering, design/build, validation, and compliance company, today announced groundbreaking for a new Biopol Laboratory, Inc. facility in Post Falls, Idaho. Biopol Laboratory is a wholly owned subsidiary of ALK-Abelló, a leading producer of pharmaceuticals for allergy immunotherapy. Biopol is ALK-Abelló's main source material supplier and one of North America's largest suppliers of allergen source materials.

The new 12.5 acre site consolidates Biopol's five facilities into a new main building of which the first phase will be approximately 68,000 sq. ft. Biopol is relocating its laboratory, offices, manufacturing facilities, and associated in-process and finished product warehouses from its present Spokane, Washington location.

IPS is providing detailed design, product development and process engineering services and ensuring validation in accordance with latest current Good Manufacturing Practices (cGMP) and Good Laboratory Practices (cGLP) requirements. The new facility will increase Biopol's capacities and scale up to meet the accelerating demand for its allergen source materials products. In addition, the site includes new pollen and mites processing buildings, as well as energy saving principles for process and utility systems, odors/dust control systems, and waste treatment.

"IPS is the perfect partner for Biopol. They have a high level of competency and the experience required for the detailed design of this bulk pharmaceutical facility," stated Miles Guralnick, President/Managing Director, Biopol Laboratory, Inc. "The Post Falls facility offers the additional space and increased capacity to enable us to continue to provide an uninterrupted supply of quality allergenic biological source materials. We look forward to a good collaboration and to a very successful project."

About IPS

Integrated Project Services (IPS), www.ipsdb.com, is a full-service, engineering firm servicing the pharmaceutical and biotechnology industries as well as medical device, diagnostics and specialty chemical. IPS services include technical consulting, engineering and design, design/build, construction management, commissioning, and compliance. Located in Lafayette Hill, Pa., IPS has full service branch offices in Pennsylvania, North Carolina, New Jersey, California, Indiana, and Puerto Rico.

About Biopol, Laboratory, Inc.

Established in Spokane, Washington in 1976, Biopol is a leading manufacturer of quality allergenic biological source materials. Biopol was acquired by Vespa Laboratories, Inc. in 1999, thereby becoming a member of the ALK-Abelló group of companies. Biopol produces and stocks over 800 different allergens. These materials are the source of proteins found in allergy immunotherapy treatments and diagnostics and analytical testing. Product categories include tree, grass and weed pollens, dust and storage mites, freeze dried foods, epithelial and environmental products. Biopol is the largest U.S. supplier of house dust mite source materials.
