**IPS OPENS TWO OFFICES IN INDIA TO OFFER CLIENTS GREATER ACCESS  
TO TECHNICAL ENGINEERING AND CONSULTING SERVICES**

**Lafayette Hill, PA, April 16, 2007** – Integrated Project Services (IPS), a leading, full-service engineering, design/build, validation and compliance company dedicated to serving pharmaceutical and biotech companies, today announced that it has opened two offices in India, located in Hyderabad and New Delhi. IPS' new offices offer greater access to an expanding team of experts providing services such as drug development, technical consulting, facility design, process engineering, commissioning and validation. In addition, IPS will focus on Oral Solid Dosage (OSD), Biopharmaceuticals and Injectable containment facilities using potent and cytotoxic compounds. As drug development and manufacturing further globalizes, IPS is well-positioned to assist pharmaceutical, biotechnology and medical device and diagnostic companies with worldwide, full-service engineering services to improve operations, revitalize facilities and stay compliant in a global regulatory environment.

With intellectual property protection and the drug development environment improving around the world, countries outside the United States are experiencing an upswing in pharmaceutical multinational activity. Companies continue to seek opportunities to establish consistency and efficiency across international operations to continue to develop and bring new, innovative and cost effective products to market. For example, India has a large number of United States (US) Food and Drug Administration (FDA) approved drug manufacturing facilities outside the US - many of which are expected to contract and manufacture on-patent pharmaceutical and biologic drugs and Active Pharmaceutical Ingredients (API) over the next few years.

“New offices in Hyderabad and New Delhi formalize our presence in this growing drug development region to meet client demand for engineering and technical expertise,” stated David Goswami, P.E., Principal and President, IPS. “By focusing on technically complex and high performance areas, we believe that our combination of global capabilities and in-depth knowledge delivers compliance-driven projects that improve operational performance and accelerate time-to-market for clients worldwide.”

**About IPS**

Integrated Project Services (IPS), [www.ipsdb.com](http://www.ipsdb.com), is a full-service, engineering firm servicing the pharmaceutical and biotechnology industries as well as medical device, diagnostics and specialty chemical. IPS services include technical consulting, engineering and design, design/build, construction management, commissioning and validation. Located in Lafayette Hill, Pa., IPS has full service branch offices in Pennsylvania, North Carolina, New Jersey, California, Indiana, Puerto Rico and India.
